

Bayou Airgun Club Field Target Match Report 2007 Cajun Classic

CAJUN SPRING CLASSIC APRIL 14-15 2007

The weather loomed as a real threat for the eighteenth anniversary match held on the Belle Terre and Lagniappe Courses of the Bayou Airgun Club. After a windy, but beautiful Friday afternoon we were all instructed by our president, Jack Kirkendoll, to watch the weather on Saturday morning. It turned out that the expected front didn't come through until around 9 am. We decided to wait until the rain ended and to eat lunch before starting the match. The lunch featuring chicken and spaghetti was delicious as usual. Some of the more serious shooters decided not to eat lunch, and there were some of us brave souls who volunteered to eat theirs after we finished ours.

The courses were beautiful in full spring glory. The target placement engineered by Bayou Airgun Club's own Joe DuBoulay, was great. At a difficulty level of 34 with all targets clearly visible, yet still challenging the course was a joy to shoot. Thanks Joe, and special thanks to Ron and Linda Juneau for your tremendous efforts, and to all who helped make the match a big success. You know who you are. Thank you BREC for being such a great host to us and to our guests.

Congratulations to you all and to everyone who came and enjoyed our company. We thoroughly enjoyed having you.
