

## CTAC August Match Report

As if four regular FT venues in Texas isn't already enough, the August Central Texas Airgun Club match held at Rancho (Ron) Robinson offered yet another change of scenery. And as has been the case at all the Texas venues all year, turn-out was excellent and included a(nother) new FT shooter.

Recently transplanted from the Chicago area (to Austin), Bob Lubecker seemed to enjoy his first FT experience (with borrowed equipment) in spite of the challenging course and demanding weather conditions. Half-way through the 35.5 average Troyer rifle match, thunder storms blew in bringing thunder, lightning, rain and easily a 1.25 wind multiplier along for the ride. We managed to finish the rifle match in a blowing downpour, the adversity reflected on the scoreboard. A (conservative) 1.25 wind multiplier gives some perspective to the challenge, however the Troyer system makes no allowances for driving rain and lightning. Of course the pistol match had to be cancelled due to the torrid weather.

For the second Yegua match in a row Sean Holbeche and Ron Robinson tied for high overall and first place Hunter PCP. Once again Sean prevailed in the shoot-off. Full match results appear below.

Also promoted as a swap n' shoot, the only wheeling and dealing I witnessed was several c-notes flying out of my wallet, into Phil Reedy's! Sure is a lovely TX, though! 😊
