Course Difficulties

The difficulties announced before and during the match were in error and did not reflect Troyer factors for distance (over 45yds), dark lanes, wind, nor multiple conditions. Most competitors would agree that "If Conditions" did apply, especially for wind. For those wanting to see the Excel file from which this page has been extracted, go [here](#). The original difficulties (shown in color below) and the corrected difficulties (shown in Black in the charts below) as computed by the Bluegrass Airgun Club are:
